Product Summary

These hangers are made from 1.2mm stainless steel cable and are designed for use with the Standard Track. The pack includes 10 x 3m cables and 10 x track slides to hold the cable up into the track. This system allows you to fit the hangers at any point rather than having to feed them into the end of the track. The ends of the cable are finished in our factory so that will not fray. If you have excess cable below the picture just coil the cable and tuck the tail end through the coil 2 or 3 times. It

will then stay in place behind the picture.

Weight bearing capacity: 30kg per hanger (20kg per hook)
